

Program Structure

General:

Live Teaching - Live Teaching sessions from Monday – Saturday from 08:45 AM to 05:45 PM.

For the Milestone(quiz and project), the submission timeline will be

Graded Quiz- 45 minutes

Graded Project- 2 hours

Courses	Day no	Date	Day	Modules	SubTopics
Introduction to .NET & C# & OOPS using C# & Data Handling using C#	Day 1	08 January 2026	Thursday	Getting started with Git basics Introduction to Version Control Implementing CI/CD Getting started with .NET platform Types in C#	Getting started with Git basics What is version control and why it is essential? Centralized vs. Distributed version control systems. Git Basics, Branching and Merging working with Remote Repositories What is CI/CD and why is it important? Key concepts: Build, Test, Release, Deploy. Tools for CI/CD: Jenkins, GitHub Actions, GitLab CI, etc. Introduction & Basic Programming Concepts Installation of Visual Studio 2019 Introduction to .NET framework .NET framework architecture Common type system Common language specification Common language runtime Base class library Introduction to Classes Reading and Writing in the console Assembly Private Shared Types Value type and Reference type Boxing and Unboxing Strings String Builder Difference between String and StringBuilder Nullable types
					Core C# Programming
					Arrays in C# Looping Construct
					Array Single array Multi-dimension Jagged array Loops and Statement IF statement For loop Foreach loop Switch statement While loop Do-while loop
					Getting Started with properties and functions
					Access modifiers in C# Methods in C#
					Access modifiers Public Protected Internal Protected internal Methods Void method With parameter Return type method Static method Instance method Namespaces Unit testing
					Getting started with Inheritance for code reusability
					Inheritance in C#.NET Polymorphism in C#.NET Object types in C#.NET User define types in C#.NET
					Object Oriented Concept Inheritance Single Multilevel Multiple (using Interface) Hierarchical Hybrid OOPs principles ie Polymorphism in Action Polymorphism Method override Method overload Encapsulation Abstraction Properties Static Static class Static method Static constructor Structs Interface Abstract Enumeration Difference between Interface and Abstract
Day 2	Day 3	09 January 2026	Friday	Day 4	10 January 2026
Day 3	Day 4	10 January 2026	Saturday	Monday	12 January 2026

				<table border="1"> <tr><td>Problem with multiple class inheritance</td></tr> <tr><td>Solution for multiple class inheritance using interface.</td></tr> <tr><td>Exception handling</td></tr> </table>	Problem with multiple class inheritance	Solution for multiple class inheritance using interface.	Exception handling																						
Problem with multiple class inheritance																													
Solution for multiple class inheritance using interface.																													
Exception handling																													
Day 5	13 January 2026	Tuesday		<table border="1"> <tr><td>File Handling in C#.NET</td></tr> <tr><td>File I/O</td></tr> <tr><td>Create</td></tr> <tr><td>Write</td></tr> <tr><td>Append</td></tr> <tr><td>Delete</td></tr> <tr><td>Copy</td></tr> <tr><td>Collections</td></tr> <tr><td>Non generic</td></tr> <tr><td>ArrayList</td></tr> <tr><td>Hash table</td></tr> <tr><td>Sorted list</td></tr> <tr><td>Stack</td></tr> <tr><td>Queue</td></tr> <tr><td>Generic</td></tr> <tr><td>List</td></tr> <tr><td>Dictionary</td></tr> <tr><td>Sorted list</td></tr> <tr><td>Stack</td></tr> <tr><td>Queue</td></tr> </table>	File Handling in C#.NET	File I/O	Create	Write	Append	Delete	Copy	Collections	Non generic	ArrayList	Hash table	Sorted list	Stack	Queue	Generic	List	Dictionary	Sorted list	Stack	Queue					
File Handling in C#.NET																													
File I/O																													
Create																													
Write																													
Append																													
Delete																													
Copy																													
Collections																													
Non generic																													
ArrayList																													
Hash table																													
Sorted list																													
Stack																													
Queue																													
Generic																													
List																													
Dictionary																													
Sorted list																													
Stack																													
Queue																													
Day 6	14 January 2026	Wednesday		<table border="1"> <tr><td>Advance topics</td></tr> <tr><td>Exception Handling in C#</td></tr> <tr><td>Introduction to Exception Handling</td></tr> <tr><td>Types of Exceptions in C#, The try, catch, finally Blocks</td></tr> <tr><td>Common Exception Classes</td></tr> <tr><td>Creating Custom Exceptions</td></tr> <tr><td>Exception Filters (C# 6.0 and Later)</td></tr> <tr><td>Exception Handling Best Practices</td></tr> <tr><td>Extension Methods</td></tr> <tr><td>Tuples and Deconstruction, Pattern Matching, Local Functions, Out Variables, Ref Locals and Returns, Discards (_) & Expression-bodied Members</td></tr> <tr><td>C# 8.0 features</td></tr> <tr><td>Nullable Reference Types, Async Streams, Ranges and Indices, Switch Expressions, Default Interface Methods, Pattern Matching Enhancements, Using Declarations & Readonly Members</td></tr> <tr><td>Importance of searching in data structures</td></tr> <tr><td>Types of searching algorithms (Linear vs Binary)</td></tr> <tr><td>Types of sorting algorithms (Comparison-based vs Non-comparison-based)</td></tr> <tr><td>Bubble Sort, Selection Sort, Insertion Sort</td></tr> <tr><td>Efficiency comparison among Bubble, Selection, and Insertion Sort</td></tr> <tr><td>Real-world scenarios for each sorting algorithm</td></tr> <tr><td>Indexer</td></tr> <tr><td>Difference between index and properties</td></tr> <tr><td>Attributes</td></tr> </table>	Advance topics	Exception Handling in C#	Introduction to Exception Handling	Types of Exceptions in C#, The try, catch, finally Blocks	Common Exception Classes	Creating Custom Exceptions	Exception Filters (C# 6.0 and Later)	Exception Handling Best Practices	Extension Methods	Tuples and Deconstruction, Pattern Matching, Local Functions, Out Variables, Ref Locals and Returns, Discards (_) & Expression-bodied Members	C# 8.0 features	Nullable Reference Types, Async Streams, Ranges and Indices, Switch Expressions, Default Interface Methods, Pattern Matching Enhancements, Using Declarations & Readonly Members	Importance of searching in data structures	Types of searching algorithms (Linear vs Binary)	Types of sorting algorithms (Comparison-based vs Non-comparison-based)	Bubble Sort, Selection Sort, Insertion Sort	Efficiency comparison among Bubble, Selection, and Insertion Sort	Real-world scenarios for each sorting algorithm	Indexer	Difference between index and properties	Attributes				
Advance topics																													
Exception Handling in C#																													
Introduction to Exception Handling																													
Types of Exceptions in C#, The try, catch, finally Blocks																													
Common Exception Classes																													
Creating Custom Exceptions																													
Exception Filters (C# 6.0 and Later)																													
Exception Handling Best Practices																													
Extension Methods																													
Tuples and Deconstruction, Pattern Matching, Local Functions, Out Variables, Ref Locals and Returns, Discards (_) & Expression-bodied Members																													
C# 8.0 features																													
Nullable Reference Types, Async Streams, Ranges and Indices, Switch Expressions, Default Interface Methods, Pattern Matching Enhancements, Using Declarations & Readonly Members																													
Importance of searching in data structures																													
Types of searching algorithms (Linear vs Binary)																													
Types of sorting algorithms (Comparison-based vs Non-comparison-based)																													
Bubble Sort, Selection Sort, Insertion Sort																													
Efficiency comparison among Bubble, Selection, and Insertion Sort																													
Real-world scenarios for each sorting algorithm																													
Indexer																													
Difference between index and properties																													
Attributes																													
Day 7	15 January 2026	Thursday		<table border="1"> <tr><td>Delegates & Reflection</td></tr> <tr><td>Delegates in C#.NET</td></tr> <tr><td>Delegates</td></tr> <tr><td>Single cast</td></tr> <tr><td>Multi cast</td></tr> <tr><td>Anonymous method</td></tr> <tr><td>Lambda expression</td></tr> <tr><td>Func</td></tr> <tr><td>Action</td></tr> <tr><td>Predicate</td></tr> <tr><td>Events</td></tr> <tr><td>Introduction to Reflection and its practical use</td></tr> <tr><td>Generics</td></tr> <tr><td>Generic class</td></tr> <tr><td>Generic field</td></tr> <tr><td>Generic method</td></tr> <tr><td>Advantage of generics</td></tr> <tr><td>Threading</td></tr> <tr><td>Ref and Out keyword</td></tr> <tr><td>Async & Await</td></tr> <tr><td>Understanding Http client</td></tr> </table>	Delegates & Reflection	Delegates in C#.NET	Delegates	Single cast	Multi cast	Anonymous method	Lambda expression	Func	Action	Predicate	Events	Introduction to Reflection and its practical use	Generics	Generic class	Generic field	Generic method	Advantage of generics	Threading	Ref and Out keyword	Async & Await	Understanding Http client				
Delegates & Reflection																													
Delegates in C#.NET																													
Delegates																													
Single cast																													
Multi cast																													
Anonymous method																													
Lambda expression																													
Func																													
Action																													
Predicate																													
Events																													
Introduction to Reflection and its practical use																													
Generics																													
Generic class																													
Generic field																													
Generic method																													
Advantage of generics																													
Threading																													
Ref and Out keyword																													
Async & Await																													
Understanding Http client																													
Advanced C# & introduction to .Net	Day 8	Friday		<table border="1"> <tr><td>Unit Testing & Test-Driven Development</td></tr> <tr><td>Introduction to Unit Testing</td></tr> <tr><td>What is unit testing?</td></tr> <tr><td>Benefits of unit testing</td></tr> <tr><td>Basic concepts and terminology</td></tr> <tr><td>Testing Frameworks</td></tr> <tr><td>Introduction to popular testing frameworks (NUnit, MSTest, XTest)</td></tr> <tr><td>Setting up a testing framework in a project</td></tr> <tr><td>Understanding test projects and test classes</td></tr> <tr><td>Writing Test Cases</td></tr> <tr><td>Anatomy of a unit test</td></tr> <tr><td>Creating test methods</td></tr> <tr><td>Organizing test classes and test suites</td></tr> <tr><td>Assertions and Test Data</td></tr> <tr><td>Using assertions to validate test results</td></tr> <tr><td>Common assertion methods (e.g., Assert.AreEqual, Assert.IsTrue)</td></tr> <tr><td>Test data setup and teardown</td></tr> <tr><td>Testing Techniques</td></tr> <tr><td>Test-driven development (TDD)</td></tr> <tr><td>Testing different scenarios (positive, negative, edge cases)</td></tr> <tr><td>Mocking dependencies using frameworks like Moq</td></tr> <tr><td>Test Execution and Reporting</td></tr> <tr><td>Running tests using the testing framework</td></tr> <tr><td>Analyzing test results and understanding test reports</td></tr> <tr><td>Handling failures and debugging failing tests</td></tr> </table>	Unit Testing & Test-Driven Development	Introduction to Unit Testing	What is unit testing?	Benefits of unit testing	Basic concepts and terminology	Testing Frameworks	Introduction to popular testing frameworks (NUnit, MSTest, XTest)	Setting up a testing framework in a project	Understanding test projects and test classes	Writing Test Cases	Anatomy of a unit test	Creating test methods	Organizing test classes and test suites	Assertions and Test Data	Using assertions to validate test results	Common assertion methods (e.g., Assert.AreEqual, Assert.IsTrue)	Test data setup and teardown	Testing Techniques	Test-driven development (TDD)	Testing different scenarios (positive, negative, edge cases)	Mocking dependencies using frameworks like Moq	Test Execution and Reporting	Running tests using the testing framework	Analyzing test results and understanding test reports	Handling failures and debugging failing tests
Unit Testing & Test-Driven Development																													
Introduction to Unit Testing																													
What is unit testing?																													
Benefits of unit testing																													
Basic concepts and terminology																													
Testing Frameworks																													
Introduction to popular testing frameworks (NUnit, MSTest, XTest)																													
Setting up a testing framework in a project																													
Understanding test projects and test classes																													
Writing Test Cases																													
Anatomy of a unit test																													
Creating test methods																													
Organizing test classes and test suites																													
Assertions and Test Data																													
Using assertions to validate test results																													
Common assertion methods (e.g., Assert.AreEqual, Assert.IsTrue)																													
Test data setup and teardown																													
Testing Techniques																													
Test-driven development (TDD)																													
Testing different scenarios (positive, negative, edge cases)																													
Mocking dependencies using frameworks like Moq																													
Test Execution and Reporting																													
Running tests using the testing framework																													
Analyzing test results and understanding test reports																													
Handling failures and debugging failing tests																													
				<table border="1"> <tr><td>.NET Security & Reliability</td></tr> <tr><td>Understanding security in .NET applications</td></tr> <tr><td>Common security practices (authentication, authorization, encryption)</td></tr> <tr><td>Secure coding practices</td></tr> <tr><td>Using .NET libraries for encryption, secure communication, and secure storage</td></tr> <tr><td>Building Reliable Applications</td></tr> <tr><td>Designing for reliability</td></tr> <tr><td>Exception handling strategies</td></tr> </table>	.NET Security & Reliability	Understanding security in .NET applications	Common security practices (authentication, authorization, encryption)	Secure coding practices	Using .NET libraries for encryption, secure communication, and secure storage	Building Reliable Applications	Designing for reliability	Exception handling strategies																	
.NET Security & Reliability																													
Understanding security in .NET applications																													
Common security practices (authentication, authorization, encryption)																													
Secure coding practices																													
Using .NET libraries for encryption, secure communication, and secure storage																													
Building Reliable Applications																													
Designing for reliability																													
Exception handling strategies																													

	Day 9	17 January 2026	Saturday		Error Handling & Logging Implementing error handling best practices Logging errors and monitoring application health
Advanced C# & introduction to .Net				SOLID Principles	SOLID Principles & Design Patterns Introduction to SOLID Principles Overview of SOLID principles (SRP, OCP, LSP, ISP, DIP) Practical Application of SOLID Refactoring code to adhere to SOLID principles
				Design Patterns	Introduction to Design Patterns Understanding the importance of design patterns in software design Overview of common design patterns (Creational, Structural, Behavioral)
	Day 10	19 January 2026	Monday		Milestone Assessment 1 (C# Fundamentals)
					Introduction, Basic Concepts, and DML Commands Installation of SQL Server Management Studio Introduction to basic database concepts. Advantage of DBMS
	Day 11	20 January 2026	Tuesday	Keys, Operators & DML Commands	Introduction to RDBMS Creating Tables Relationship between tables. Primary keys, Foreign keys, Unique keys SQL operators (Arithmetic, Comparison, Logical) DML Commands CRUD operations
				SQL Fundamentals	DDL, DCL, and TCL Commands SQL commands Constraints Primary key Foreign key Types of constraints - Not null, Check, Unique. DDL Commands DCL & TCL Commands Grant & Revoke, Commit & Rollback
Basics of Microsoft SQL Server / MS SQL Querying Capabilities	Day 12	21 January 2026	Wednesday	Function in SQL Server	Advanced Queries, Functions, and Joins Functions Built-in Functions Scalar functions (e.g., LEN, ROUND, GETDATE) Aggregate functions (e.g., SUM, AVG, COUNT) User-defined Functions
	Day 13	22 January 2026	Thursday	Working with Queries	Aggregate functions Joins Inner join Left join Right join Self-join Full outer join Cross join Set operators Union Intersect Minus
	Day 14	23 January 2026	Friday	Stored Procedures and Triggers	Stored procedure Input and Output parameter If Else Transaction Error Handling Functions Scalar function Table value function Single table value Multi table statement Difference between SP and function. Call functions in SP.
					HTML / CSS / JavaScript
	Day 15	24 January 2026	Saturday	HTML	Basic Structure of an HTML Page Various Tags and Attributes Inline and Block Elements Forms Semantic elements HTML 5 Features Paper based Layout Hero unit Audio Video Players Semantic Markup Geo Location, A11Y (Accessibility)
HTML CSS and Bootstrap	Day 16	27 January 2026	Tuesday	CSS	Intro to CSS CSS Properties and their syntaxes Various Selectors in CSS and their preference orders Inline , Internal and External Styling Box Model CSS 3 Advance Units like rem, em and vh vw New elements added like Round Corners Working with flex box
	Day 17	28 January 2026	Wednesday	Bootstrap	Working with Bootstrap Cards, Tables, and Lists Develop a static webpage, Forms and Form Validations Navs and Navbar, Pagination and Progress Navigation and Pagination
	Day 18	29 January 2026	Thursday		Milestone Assessment 2 (SQL Fundamentals)
	Day 19	30 January 2026	Friday	Basics of JavaScript	Basics of JavaScript - Introduction to JavaScript, Data type, variables, Functions and scope Type Conversions, Basic Operators

				Branching, Conditional statements, and Looping Statements, Functions, Arrays and Strings	
Getting started with React FrontEnd	Day 20	31 January 2026	Saturday	Advanced Java Script	Modern JavaScript (ES6): Javascript - Fetch API, Arrow functions, Template literals, Destructuring, Spread and rest operators
	Date and Time Objects, Closures, Promises and Async Programming, Closures and Scoping, DOM Manipulation: DOM Objects, Accessing elements in the DOM, Modifying HTML content, Adding and removing elements				
	Day 21	02 February 2026	Monday		Functional Programming, Error Handling, client side scripting
	JSON, JSON - Objects, arrays etc, JSON-Ajax Advanced DOM Manipulation,				
	jQuery Plugins, Event Delegation, Ajax and Deferred Objects, Optimization and Performance				
Getting started with React FrontEnd	Day 22	03 February 2026	Tuesday	Single Page Applications (SPA) Fundamentals	SPA & Working with NPM
	Differences between SPA and traditional web applications Architecture of SPA vs multi-page apps Advantages of SPA: performance, scalability, and user experience Common use cases and industry scenarios for SPA development				
	Day 23	04 February 2026	Wednesday	Working with NPM	Introduction to NPM and Node package ecosystem Initializing a project using npm init Installing, updating, and removing packages (npm install, npm update, npm uninstall) Understanding package.json and package-lock.json Dependency management best practices
	TypeScript Module (2 Days)				
	Day 24	05 February 2026	Thursday		Introduction to TypeScript and its benefits over JavaScript Setting up the TypeScript development environment Creating and managing TypeScript projects Core TypeScript concepts (types, interfaces, functions, classes, modules) Type safety and compile-time error checking
Power Platform & Reporting Tools (3 Day)	Day 25	06 February 2026	Friday	Tooling, Build & Execution	Using Visual Studio / VS Code features for TypeScript development Project configuration using tsconfig.json Building and transpiling TypeScript applications Running and debugging TypeScript applications Best practices for structuring scalable TypeScript projects
	Day 26	07 February 2026	Saturday	Milestone Assessment 3 (Javascript + Typescript)	
	Power Platform & Reporting Tools (3 Day)				
	Day 27	09 February 2026	Monday	Fundamentals of Power Platform	What is Microsoft Power Platform Overview of Power BI, Power Apps, Power Automate, Power Virtual Agents How Power Platform components work together Common enterprise use cases and integrations
	Day 28	10 February 2026	Tuesday	SSRS – Reporting Fundamentals	Introduction to SSRS architecture Standard operations in SSRS (Data Sources, Datasets, Reports) Creating a simple SSRS report using SQL Server Report deployment and execution
Azure Module – .NET with Microsoft Dynamics CRM (4 Days)	Day 29	11 February 2026	Wednesday	Reporting Tool Comparison & Visualization	SSRS (SQL-native reporting) vs Power BI (modern visualization) When to use SSRS vs Power BI in real projects Limitations and strengths of each tool Reporting best practices and performance considerations
	Day 30	12 February 2026	Thursday	Azure Identity & Secure Access	Azure Module – .NET with Microsoft Dynamics CRM (4 Days)
	Role of Azure in Dynamics CRM architecture Azure Active Directory (AAD) for authentication & authorization Azure AD B2C for external/portal users Secure access patterns for CRM integrations				
	Day 31	13 February 2026	Friday	Serverless & Workflow Automation	Azure Functions for custom business logic Real-time data transformation and automation scenarios Azure Logic Apps for workflow orchestration Integrating external APIs with Dynamics CRM
	Day 32	14 February 2026	Saturday	Data, Storage & Monitoring	Azure Blob Storage for large documents and attachments Optimizing CRM performance using external storage Azure Key Vault for secrets, certificates, and credentials Azure Application Insights for monitoring, logging, and alerts
Analytical & Data-Driven Concepts Module (2 Days)	Day 33	16 February 2026	Monday	DevOps & Data Integration	Azure DevOps for source control and CI/CD pipelines Deploying Dynamics CRM customizations via pipelines Azure Data Factory for ETL and data migration Data synchronization between CRM and external systems
	Day 34	17 February 2026	Tuesday	Introduction to Analytical Thinking	Analytical & Data-Driven Concepts Module (2 Days)
	Definition and importance of analytical thinking Role of analytical thinking in data-driven organizations Key benefits of analytical thinking for business decision-making Overview of analytical vs intuitive decision-making				
	Day 35	18 February 2026	Wednesday	Analytical Thinking & Data-Driven Process	Understanding the problem and business context Problem definition and root cause analysis Defining objectives and analytical questions Gathering and preparing data Applying analytical methods Generating insights for business actions Presenting findings to stakeholders Common data analytics tools overview Selecting the right tool for a given problem
	Day 36	19 February 2026	Thursday	Milestone - 4(Power platform + Dynamics CRM+ Data driven processes)	
Capstone	Day 37-41	20 February 2026 - 25 February 2026	Friday - Wednesday	Capstone Project (5 days) The capstone validates full-stack enterprise readiness by integrating backend engineering, frontend SPA, cloud-native services, analytics, and business storytelling.	
	Day 42	26 February 2026	Thursday	Final Assessment - Only MCQ based on case studies
